ABOUT ME

Hello! My name is Murodilla. I am 19 years old. I was born and raised in **Tashkent, Uzbekistan**. I started programming when I was 17 years old. I learned programming by self study. (of course, many thanks to **Google, YouTube and Telegram**). I started programming with the **Python** programming language. After passing the basic level, I started doing small chat-bot projects on Telegram. After a lot of hard work and attempts, I started gaining experience and started accepting orders for the **Telegram bot**. Right now I'm learning **Django** and doing some small projects.

INTERNSHIPS

Backend Developer   Jun 2022 - Sep 2022
IT Park, Tashkent
After completing the 1st year, I was sent to **It Park** to conduct an internship. I learned a lot about the **Django** framework there, including **deploying** a project into a servers.
