SUMMARY

Hi there! I'm Murodilla, a 20-year-old from Tashkent, Uzbekistan. My programming journey started when I was just 17, self-studying with the help of resources like Google, YouTube, and Telegram. I began my coding journey with the Python programming language and progressed to creating small chat-bot projects on Telegram. After persistent effort and practice, I gained valuable experience and even started accepting orders for Telegram bots. Currently, I am honing my skills in Django while working on some small projects.

EXPERIENCE

Backend Developer

IT Park

📅 06/2022 - 09/2022   📍 Uzbekistan, Tashkent

After completing my first year, I was sent to IT Park in Tashkent for an internship where I gained extensive knowledge about the Django framework. During my time there, I had the opportunity to deploy a project onto servers, further enhancing my skills and experience in web development.

- I have developed over two websites, ranging from blogs to portfolios, showcasing my proficiency in web development.
